

Delves Lane Primary School Curriculum Map

Science

			Identifying animals	Identifying plants
Year 1	Year 1 - asking simple questions and recognising that they can be answered in different ways Year 1 - observing closely, using simple equipment Year 1 - performing simple tests Year 1 - identifying and classifying Year 1 - using their observations and ideas to suggest answers to questions Year 1 - identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense carnivore, herbivore, omnivore, head, neck, arm, elbow, hand, leg, knee, foot, face, ear, nose, eye, hair, mouth, teeth, sight, hear, smell, touch, taste	Fiveryday materials Year 1 - observing closely, using simple equipment Year 1 - performing simple tests Year 1 - identifying and classifying Year 1 - using their observations and ideas to suggest answers to questions Year 1 - distinguish between an object and the material from which it is made Year 1 - identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock Year 1 - describe the simple physical properties of a variety of everyday materials Year 1 - compare and group together a variety of everyday materials on the basis of their simple physical properties Solid, bending, squashing, twisting, stretching, similarity, difference, property, hard/soft, shiny/dull, bendy/not bendy, stretchy/stiff, transparent/opaque, rough/smooth, waterproof/not waterproof, absorbent/not absorbent, metal, plastic, glass, brick, paper, fabric, foil, elastic, wood	 Year 1 - asking simple questions and recognising that they can be answered in different ways Year 1 - observing closely, using simple equipment Year 1 - identifying and classifying Year 1 - identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals Year 1 - identify and name a variety of common animals that are carnivores, herbivores and omnivores Year 1 - describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets) Animals, Invertebrate (worm, spider, insect (various), woodlouse, centipede), fish, amphibian, reptile, bird, mammal, carnivore, herbivore, 	 Year 1 - asking simple questions and recognising that they can be answered in different ways Year 1 - observing closely, using simple equipment Year 1 - identifying and classifying Year 1 - using their observations and ideas to suggest answers to questions Year 1 - gathering and recording data to help in answering questions Year 1 - identify and name a variety of common wild and garden plants, including deciduous and evergreen trees Year 1 - identify and describe the basic structure of a variety of common flowering plants, including trees
			bird, mammal,	vegetables, (variety

National curriculum objectives

Key vocabulary to introduce/ revisit

Seasonal changes

- Year 1 asking simple questions and recognising that they can be answered in different ways
- Year 1 observing closely, using simple equipment
- Year 1 performing simple tests
- Year 1 identifying and classifying
- Year 1 using their observations and ideas to suggest answers to questions
- Year 1 gathering and recording data to help in answering questions
- Year 1 observe changes across the four seasons
- Year 1 observe and describe weather associated with the seasons and how day length varies

Season, sun, sky, autumn, winter, spring, summer, year, month, week, day, weather (various), temperature, weather, rainfall, daylength, sun, shadow

			Living in habitats	
				Growing plants
			 Year 2 - observing closely, using simple equipment Year 2 - identifying and classifying Year 2 - using their observations and ideas to suggest answers to questions 	 Year 2 - asking simple questions and recognising that they can be answered in different ways Year 2 - observing closely, using simple
	Growth and survival	Exploring everyday materials	 Year 2 - explore and compare the differences between 	equipmentYear 2 - performing simple tests
	 Year 2 - asking simple questions and recognising that they can be answered in different ways Year 2 - performing simple tests 	Year 2 - asking simple questions and recognising that they can be answered in different ways	things that are living, dead, and things that have never been alive	Year 2 - identifying and classifyingYear 2 - using their
Year 2	 Year 2 - identifying and classifying Year 2 - using their observations and ideas to suggest answers to questions Year 2 - gathering and recording data to help in answering questions Year 2 - notice that animals, including humans, have offspring which grow into adults Year 2 - find out about and describe the basic needs of animals, including humans, for survival (water, food and air) Year 2 - describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene 	 Year 2 - observing closely, using simple equipment Year 2 - identify that most living things live in habitats to which Year 2 - identifying and classifying Year 2 - using their observations and ideas to suggest 	observations and ideas to suggest answers to questions Year 2 - explore and compare the differences between	
		answers to questions Year 2 - identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses	different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on	things that are living, dead, and things that have never been allive • Year 2 - identify that
		 Year 2 - find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching 	 Year 2 - identify and name a variety of plants and animals in their habitats, including micro- habitats 	most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and
	Growth, reproduction, offspring, life-cycle (stages for examples, e.g. human, frog, butterfly, etc), baby, offspring, toddler, child, teenager, adult, water, food (nutrition), air (breathing, respiration), diet, balanced, obesity, starvation, exercise, fitness (heart rate/pulse), hygiene, microbes (bacteria, fungi, viruses)	 Material types (e.g. wood, metal, plastic, wool, cotton, paper, cork, rock, etc), soliid, liquid, gas, waterproof, hard, soft, flexible, stretch, bend, twist, squash, shiny, dull, warm, cold, colour, more, less, fluid, flow 	 Year 2 - describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food 	plants, and how they depend on each other • Year 2 - identify and name a variety of plants and animals in their habitats, including microhabitats
			1000	 Year 2 - observe and describe how seeds and bulbs grow into mature plants
			 Living, dead, non- living, movement, making energy (respiration), sensitivity, growth, 	 Year 2 - find out and describe how plants need water, light and a suitable

		reproduction, getting rid of waste (excretion), nutrition, habitat, microhabitat, adapted, adaptation, conditions, light, temperature, water, humidity, food chain	Grow, seed, bulb, (tuber), leaf, root, stem, flower, fruit, germination, seedling, water, light, temperature, reproduction
--	--	--	--

Health and movement	Forces and magnets		How plants grow	Light and shadow
Year 3 - asking relevant questions and using different types of scientific enquiries to answer them Year 3 - gathering, recording, classifying and presenting data in a variety of ways to help in answering questions Year 3 - recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables Year 3 - reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions Year 3 - identifying differences, similarities or changes related to simple scientific ideas and processes Year 3 - identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat Year 3 - identify that humans and some other animals have skeletons and muscles for support, protection and movement Nutrition, nutrients, diet (balanced/unbalanced), sugar, protein, fat, vitamins, minerals, water, energy, oxygen, feeding, eating, photosynthesis, circulation, blood, heart,	Year 3 - asking relevant questions and using different types of scientific enquiries to answer them Year 3 - setting up simple practical enquiries, comparative and fair tests Year 3 - making systematic and careful observations and, where appropriate, taking accurate measurements using	Rocks, fossils and soils Year 3 - setting up simple practical enquiries, comparative and fair tests Year 3 - making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers Year 3 - gathering, recording, classifying and presenting data in a variety of ways to help in answering questions Year 3 - reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions Year 3 - using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions Year 3 - using straightforward scientific evidence to answer questions or to support their findings Year 3 - compare and group together different kinds of rocks on the basis of their appearance and simple physical properties Year 3 - describe in simple terms how fossils are formed when things that have lived are trapped within rock Year 3 - recognise that soils are made from rocks and organic matter Rock (types), smooth, shiny, rough, crumbly, grainy, crystals, hard, soft, cold (etc), fossil (types), sediment, layers, pressure, soil, organic matter, vegetation, compost	 Year 3 - asking relevant questions and using different types of scientific enquiries to answer them Year 3 - setting up simple practical enquiries, comparative and fair tests Year 3 - making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers Year 3 - gathering, recording, classifying and presenting data in a variety of ways to help in answering questions Year 3 - recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables Year 3 - reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions Year 3 - using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions 	 Year 3 - settling up simple practical enquiries, comparative and fair tests Year 3 - making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers Year 3 - gathering, recording, classifying and presenting data in a variety of ways to help in answering questions Year 3 - recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables Year 3 - reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions Year 3 - using straightforward scientific evidence to answer questions or to support their findings Year 3 - recognise that they need light in order to see things and that dark is the absence of light Year 3 - notice that light is reflected from surfaces

vertebrate, invertebrate,	_	
skeleton (simple examples of bones), support, protection,	Year 3 - compare how things move on different surfaces	 Year 3 - identifying differences, similarities or changes related to Year 3 - recognise that light from the sun can be dangerous and that
movement	 Year 3 - notice that some forces need contact between 	simple scientific there are ways to ideas and processes protect their eyes
	two objects, but magnetic forces can act at a distance Year 3 - observe how magnets attract or	Year 3 - using straightforward scientific evidence to answer questions or to support their findings Year 3 - recognise that shadows are formed when the light from a light source is blocked by
	repel each other and attract some materials and not	Year 3 - identify and describe the in the way that the
	others • Year 3 - compare and group together a variety of everyday	functions of different size of shadows parts of flowering change plants: roots, stem/trunk, leaves
	materials on the basis of whether they are attracted to a magnet, and identify	and flowers • Year 3 - investigate the way in which water is transported • Light, dark/ darker/ darkest bright
	some magnetic materials	within plants //brighter/ brightest, film, light source
	Year 3 - describe magnets as having two poles	part that flowers play in the life cycle of flowering plants, including pollination, block (transparent,
	Year 3 - predict whether two magnets will attract or repel each other, depending on which poles are facing	seed formation and seed dispersal opaque)
		Grow, seed, bulb, (tuber), leaf (petiole), root (root hairs), stem, flower
	Force, push, pull, contact force, distance force, gravity, force arrow, movement	(petals, sepals, stamens, ovary, pollen, eggs), fruit, germination,
	(associated terminology), magnetic, magnetism, poles	seedling, water, light, temperature, nutrients, reproduction, pollination (wind,
	(north, south), attract, repel, non- magnetic	insect), fertilisation, seed, dispersal

charts, and tables Year 4 - gathering, recording, classifying and and, when the presenting data in a variety of ways to help in appropria	Juestions different systematic and careful observations of answer appropriate, taking accurate stiting up
questions and using different types of scientific enquiries to answer them • Year 4 - asking relevant questions and using different types of scientific enquiries to answer them • Year 4 - setting up simple practical enquiries, comparative and fair tests • Year 4 - recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables • Year 4 - gathering, • Year 4 - asking relevant questions and using different types of scientific enquiries to answer them • Year 4 - asking relevant questions and using different types of scientific enquiries to answer them • Year 4 - setting up simple practical enquiries, comparative and fair tests • Year 4 - making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers • Year 4 - gathering, recording, classifying and presenting data in a variety of ways to help in	Juestions different systematic and careful observations o answer appropriate, taking accurate measurements using
A vear 4 - reporting on findings from enquifies, including oral and written explanations, displays or presentations of results and conclusions and conclusions to help in answering differences, similarities or changes related to simple scientific leas and processes • Year 4 - identifying differences, similarities or changes related to simple scientific leas and processes • Year 4 - using straightforward scientific evidence to answer questions or to support their findings • Year 4 - describe the simple functions of the basic parts of the digestive system in humans • Year 4 - identify the different types of teeth in humans and their simple functions • Year 4 - construct and interpret a variety of food chains, identifying produces, predators • Year 4 - using straightforward scientific evidence to answer questions or to support their findings • Year 4 - identify the different types of teeth in humans and their simple functions • Year 4 - construct and interpret a variety of food chains, identifying produces, predators • Year 4 - using straightforward scientific evidence to answer questions or to support their findings • Year 4 - identify how sounds are made, associating some of them with something vibrating • Year 4 - fecoording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables • Year 4 - using straightforward scientific evidence to answer questions or to support their findings • Year 4 - identify how sounds are made, associating some of them with something vibrating • Year 4 - find patterns between the pitch of a sound and features of the object that produced it • Year 4 - find patterns between the volume of a sound and the strength of the vibrations that produced it • Year 4 - find patterns between the volume of a sound and the strength of the vibrations that produced it • Year 4 - find patterns between the volume of a sound and the strength of the vibrations that difference simple scientific language, arawings, labelled diagrams, keys, bar charts	a range of equipment, including thermometers and data loggers Year 4 - gathering, recording, classifying and presenting data in a variety of ways to help in answering questions Year 4 - recording findings using simple scientific language, drawings, labelled diagrams, keys, bar datables diagresults mple so, make is for new goes tents and error elated to entific processes entific and wider environment entify appliances on construct a descriptions of equipment in their local and wider environment entify appliances or construct a description including things construct a constru

	Forces in action	Life cycles			Changes and reproduction
	Torces in action	_		Life evelos	Changes and reproduction
Year 5	Year 5 - planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary Year 5 - taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate Year 5 - recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs Year 5 - reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations Year 5 - explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object Year 5 - identify the effects of air resistance, water resistance and fiction, that act	Year 5 - taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate Year 5 - recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs Year 5 - reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations Year 5 - identifying scientific evidence that has been used to support or refute ideas or arguments Year 5 - describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird Year 5 - describe the life process of reproduction in some	Properties and changes of materials Year 5 - planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary Year 5 - reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations Year 5 - compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets Year 5 - know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution Year 5 - use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating Year 5 - give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic Year 5 - demonstrate that dissolving, mixing and changes of state are reversible changes Year 5 - explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda Material (types), properties (types), solid, liquid, gas.	Life cycles Earth and Space • Year 5 - recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs • Year 5 - describe the movement of the Earth, and other planets, relative to the Sun in the solar system • Year 5 - describe the movement of the Moon relative to the Earth • Year 5 - describe the sun, Earth and Moon as approximately spherical bodies • Year 5 - use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky • Solar system, planets (names), star, sun, Earth, moon, gravity, orbit (elliptical), relating axis poles	Year 5 - planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary Year 5 - taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate Year 5 - recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs Year 5 - using test results to make predictions to set up further comparative and fair tests Year 5 - reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations
	effects of air resistance,	life process of	 Material (types), properties (types), solid, liquid, gas, solution, mixture, particle, energy, dissolve (solute, solvent, saturation), filtering, sieving, evaporating, reversible, irreversible 	(names), star, sun, Earth, moon, gravity,	written forms such as displays and other

	• Force, contact, non-contact, push, pull, friction, air resistance, water resistance, up-thrust, drag, gravity, balanced, unbalanced, force arrow, accelerate, decelerate, Newton, force meter, mass, multiplier, lever, pulley, gear, pivot, fulcrum, effort, load, machine	gamete, petals, sepals, carpel, stigma, ovary, anther, stamen, pollen, pollination, fertilisation, dispersal			 Baby, toddler, child, adolescent, adult, offspring, puberty, pubic hair, egg, sperm, testes, ovaries, oviduct, uterus, cervix, vagina, vulva, sperm duct, foreskin, scrotum, glands, erection, ejaculation, intercourse, fertilisation, gamete.
--	---	---	--	--	---

Classifying organisms	Changing circuits		Evolution and inheritance	Seeing light
Year 6 - planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary Year 6 - recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs Year 6 - reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations Year 6 - describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals Year 6 - give reasons for classifying plants and animals based on specific characteristics Classification, binomial, kingdom (phylum, class, order, family, genus, species), vertebrate, invertebrate, microorganisms, bacteria, fungi, virus, pacteria, fungi, virus, protist), classification characteristics (various), spider/number key, diversity, variation	 Year 6 - planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary Year 6 - reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations Year 6 - associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit Year 6 - compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches Year 6 - use recognised symbols when representing a simple circuit in a diagram Circuit, electricity, energy, cell, battery, positive terminal, negative terminal, negative terminal, resistance, resistor, filament, 	Year 6 - planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary Year 6 - taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate Year 6 - recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs Year 6 - reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations Year 6 - identifying scientific evidence that has been used to support or refute ideas or arguments Year 6 - identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood Year 6 - recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function Year 6 - describe the ways in which nutrients and water are transported within animals, including humans Organs (various), circulatory system, circulation, blood, plasma, red blood cells, oxygenated, deoxygenated, exchange, artery, vein, heart, heart chambers, pulse, recovery time, drugs (various), alcohol, nicotine, tar	 Year 6 - recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs Year 6 - reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations Year 6 - identifying scientific evidence that has been used to support or refute ideas or arguments Year 6 - recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago Year 6 - recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents Year 6 - identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution 	Year 6 - planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary Year 6 - reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations Year 6 - recognise that light appears to travel in straight lines Year 6 - use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye Year 6 - explain that we see things because light travels from light sources to our eyes or from light sources to our eyes or from light sources to our eyes of the dea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them Light source, luminous, non-luminous, energy,

	switch,	zer, motor, ries, , Ammeter	 Fossil, extinction, variation, inheritance, feature, adaptation (various), species, natural selection, evolution 	absorbed, reflected, transmitted, scattered, shiny, opaque, reflective, transparent, translucent, image, plane, concave, convex, mirror, shadow.
